Newport News Public Schools has partnered with Health Hero for the last four years to offer our students in school, flu vaccine clinics. We have 42 schools (K-12) in our division; all of our students are given the opportunity to receive the flu vaccine from Health Hero, regardless of their insurance status.

We provide the locations for the flu clinics; Health Hero provides all of the supplies. They set up and break down the clinics without the need of help from school employees. All trash and sharps are removed by Health Hero. The vaccination team is professional, well organized and flexible. They travel between all of our schools providing the clinics at no cost to our division.

Because of the success and efficiency of their process, we have now started to use Health Hero to assist with our mandatory TDAP vaccinations.

We love working with them and plan to continue the partnership well into the future. Without hesitation, I would recommend Health Hero to all school divisions, large or small.

Nancy J. Carlson, RN, BSN
